

# 1003

## Production Information – March 2005

### Description

A low tack 50 micron polythene surface protection film coated with a emulsion Acrylic adhesive system. Good resistance to moisture, sunlight and variable climatic conditions.

### Applications

- . Mirror finish steels (where bending or cutting is required).
- . Medium gloss paint finishes.
- . Anodised aluminium laminates (speaker cabinets e.t.c)
- . Glass (Temporary dust barrier and scratch protection)

### Technical Details

Total Thickness	0.049mm
Backing Thickness	0.045mm
Tensile Strength Length	27 n/mm <sup>2</sup>
Transverse	17 n/mm <sup>2</sup>
Steel Adhesion	200g/25mm
Dielectric Strength	-
Colours	Blue and Clear

### Note

Unless otherwise indicated, the figures above are average values and should not be treated at face value for specification purposes. The Company reserves the right to improve products, and any change in specification will result in a re-issue of the information sheet. Customers should satisfy themselves that the tape is suitable for their requirements whether after such modification or otherwise. Please check that you have the latest issue of the information sheet. All slitting and length tolerances are to British Standards, but other tolerances are available by request.
