**General Graphic end use where a tough, tear and water resistant printable substrate is of prime importance.**

DuPont™ Tyvek® is made from pure polyethylene fibres randomly laid and compressed to form a remarkably tough printing substrate that is ideal for all applications where durability is of prime importance. Containing no foreign fillers, binders or colouring agents DuPont™ Tyvek® is non-toxic, environmentally friendly and 100% recyclable. In addition to its durability, Tyvek® can be slit, punched, scored, die-cut, laminated, embossed, glued, grommet and sewn, making it extremely versatile.

Available in a range from 42 gsm to 105gsm "soft" and paper-like "hard" structure we will have a style suitable for your requirements.
