Declaration of Conflict Metals

We have contacted our raw material suppliers with regards to the aforementioned subject notably in the eastern provinces of the Democratic Republic of the Congo.

On the basis of the available data from our raw material suppliers, we can advise that no conflict metals (Gold(Au), Tin(Sn), Tantalum(Ta) or Tungsten(W)) are knowingly used or intentionally added in the manufacturing process.

Please note that we do not routinely check for these components, and therefore it is not possible for us to state categorically that these are free from these substances. Trace amounts may be present in the atmosphere giving the potential for low-level contamination.

Furthermore, FLEXcon Europe have supplier agreements in place, where they advise/inform of changes to materials or processes that will affect the products supplied. FLEXcon Europe would then inform their Customers accordingly.

Yours sincerely,

Mark Woodward
Compliance Specialist
FLEXcon Europe Ltd
