## **REACH – Confirmation of Substance Pre-Registration**

Dear Sir or Madam,

Evonik Röhm GmbH is proud to be a reliable partner to its customers. We fully comply with the provisions of the European Chemicals Regulation (REACH) and are treating the pre-registration and registration procedures required under the REACH Regulation as a high priority.

Evonik Röhm GmbH only uses substances that comply to REACH. In response to your request, we are pleased to inform you that we already pre-registered those substances contained in the products you purchase from us. This approach allows us to use the transition periods for substance registration optimally to ensure that production processes are not affected.

In our own interest, we are as well in contact with our suppliers to ensure the appropriate pre-registration or registration of the substances (incl. monomers) contained in products (preparations) that we purchase from these suppliers in accordance with REACH requirements. We also request pertinent information on these issues from our suppliers. However, please note that we cannot obligate our suppliers to meet their pre-registration or registration requirements under REACH.

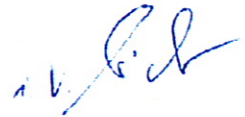

Please understand that we will not be able to forward the pre-registration numbers of substances contained in our products. This number has been established only for administrative purposes and will disappear at the end of the registration process. In December 2008 ECHA has disclosed a list of pre-registered substances without the pre-registration number.
